

Congratulations on your engagement!

Welcome to your budget planning tool, this spreadsheet is designed to help you with allocating your money and tracking your overall wedding expenses.

Typical Wedding Budget

This spreadsheet presents the breakdown of a typical wedding budget. It shows the percentages of the overall budget that are typically allocated to which type of services or vendors.

Every wedding is different but this is a good guideline to help you get started.

Your Wedding Budget

This spreadsheet allows you to try out different scenarios for allocating your budget.

By changing any of the green fields, you can see how an increase or decrease in spending on one vendor will affect your overall budget. For example, if you know you want to go all out on flowers and are prepared to be more economical on invitations, increase the dollar amount for florals and decrease the stationary amount.
